

EU Transport Commissioner Antonio Tajani:

European Union airlines lose 10,000 bags per day!

Air Transport Users Council:

On average one bag is misplaced for every 60 passengers

ReboundTAG is your luggage's best friend. The tag ensures secure and efficient baggage handling across the world!

With ReboundTAG, airport personnel and automatic RFID systems can track your luggage in real time. If ever lost, the tag facilitates a smooth return – you get notified through SMS and emails throughout the process.

ReboundTAG collaborates with major airlines of the world and was exclusively invited by Lufthansa to the 2010 IATA Annual General Meeting. It uses robust and patented technology, which includes a double set of microchips, a printed barcode and a human readable number, making the tags compatible with all airports worldwide.

Tag your luggage and register online at [www.reboundtag.com](http://www.reboundtag.com) with your travel details and contact information. Then sit back, relax and travel with peace of mind!

*"ReboundTAG takes the worry out of traveling. Get VIP luggage handling today!"*

Megan Wynes  
Abu Dhabi Week

RFID is now used at 100 large airports worldwide

*"RFID for baggage is going to be analogous to when the FAA first used radar. Once we turn it on, we will have a level of visibility we've never had before."*

# Travel with peace of mind

### Secure baggage handling

At check in, your flight details get coded into the tag facilitating secure and efficient baggage handling across the world.

### Global standard

The tag is compatible with the IATA standard, which ReboundTAG has developed jointly with major international airlines.

### Privacy protection

Your personal information can not be read by other travelers, preventing targeted bag and identity theft.

### Multi-tracking

A lost bag is easily tracked by automatic RFID systems, airport personnel, taxi drivers, hotel staff and people anywhere.

### Smooth return

Bag lost? Get notified through SMS and emails throughout the return process.
